

MATURITY ASSESSMENTS

CREATING COMPETITIVE ADVANTAGE

The ETS Maturity Assessment Database (affectionately named MAD) is now released at Version 6. Aligned with the Project Management Institute (PMI) the database contains over 250 entries which can pinpoint the exact state of an organisations maturity.

Our maturity assessments can be performed on different areas of an organisation—from departmental level, all the way up through a division to even a whole company.

A full reporting pack detailing the results of a maturity assessment and making recommendations on where to make the largest gains in the shortest timeframes is provided at the end of the assessment. If a number of these are performed over a period of time, improvements can be measured.
